## Type 1045 Pressure Switches

**Bürkert is well known for an extensive range of Solenoid and Control Valves as well as various instruments.**

To complete the range of sensors for easy on-off pressure control Burkert can provide a small and low-cost pressure switch with normally open or closed contact or even a changeover function. Models are available to handle up to 85°C and 100bar (Switch range 1 to 10bar).

Typical applications air, hydraulic oil, oil emulsions and water.
