Polishing or filing metal

SELLING POINTS

1. The metal parts are made of T12 high carbon steel, fully heat-treated for high hardness and long lifespan. The fine teeth are very suitable for precision grinding.
2. Comfortable non-slip handle, ergonomically designed to provide better control and feel.
3. The set includes flat, round, triangular, square, and half-round files, making it ideal for various forms of grinding or filing metal. The flat file is suitable for flat surfaces, the round file is used for filing round holes, enlarging holes, and smoothing curved surfaces, the triangular file is suitable for grinding internal corners or edges, the square file is suitable for grooves, and the half-round file is
